Video: Yes.

Displaytime: 15-20 seconds

Visible in fullscreen: Yes

Additional technical information regarding swf(flash) formats:

The player handles all the click events, the ads should not contain any clickareas.

As the ads are loaded into another flash(the player) they are not allowed to set anything on "Stage", "_level", "_global", "Scene" or "System". "_root" is the only thing that is allowed.

Keep in mind that some extensions like "MC Tween" do use "_global" and are therefore not allowed as it might clash with the players own "Mc Tween" or other ads that might disregard these requirements.

The ads are not allowed to affect the overall performance or usability of the player.
